

BRAND IDENTITY SYSTEM & LOGO APPLICATION GUIDE

Master Creative Direction & Production Asset Manual

Human Intelligence + Artificial Intelligence = Brainy

Version 2.0 ? Production Release ? Premium Monochrome Direction

1. Core Philosophy: The Duality of Intelligence

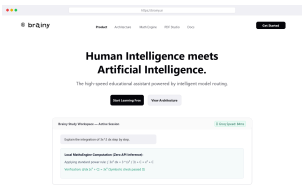

Left Hemisphere ? Artificial Intelligence:
Composed of minimal, intentional orthogonal and 45-degree circuit traces with circular terminal pads. Communicates engineering discipline, machine reasoning, and verified logic.

Right Hemisphere ? Human Intelligence:
Abstract, organic cerebral convolutions echoing natural human brain structure. Controlled continuous curves express warmth, active thinking, and human agency.

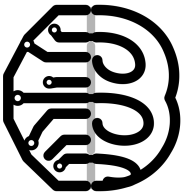

Central Synaptic Connector:
An integrated central longitudinal axis connects the two halves with balanced negative space, signifying seamless collaboration between human intuition and machine assistance.

2. Official Logo Variations

A. Horizontal Brand Lockup (Primary Identifier)

B. Standalone Symbol & Micro-Mark

Use the standalone symbol for app loading screens, watermarks, avatars, and UI locations where the wordmark is already prominent.

The Micro-Mark (brainy-micro-mark.svg) features boosted optical stroke weights and simplified geometry engineered specifically for 16px to 32px favicon and badge clarity.

C. Dedicated Application Icon (Squircle)

Asset: brainy-app-icon-1024.png / 512 / 192 / 180
Dark charcoal background (#09090b) with smooth continuous squircle curvature (radius 22%).
Optically centered white symbol. Strictly no text inside the application icon.

3. Monochrome Palette & Typographic System

Core Monochrome Colors:
? Pure Black (#000000): Primary logo on light backgrounds, primary high-contrast headlines.
? Pure White (#FFFFFF): Reverse logo on dark backgrounds, cards, and modal canvas.
? Near Black (#09090B): Application background for dark mode, desktop icon containers.
? Dark Charcoal (#18181B): Sidebar containers, elevated card surfaces, code blocks.
? Muted Zinc (#71717A): Secondary text, timestamps, captions, and inactive icons.
? Light Border (#E4E4E7): Subtle 1px structural dividing lines in light mode.

Official Typography Hierarchy:

? Brand Wordmark: Bespoke geometric lowercase 'brainy' (vectorized in SVG).
? Interface & Headings: Inter, Segoe UI, or SF Pro Display (Clean modern grotesque sans-serif).
? Code & Mathematical Formulas: JetBrains Mono or Fira Code (Monospace precision).
? Mathematical Typesetting: KaTeX / LaTeX typesetting for symbolic verified proofs.

4. Official Logo Application Matrix

TOUCHPOINT / CONTEXT	RECOMMENDED OFFICIAL ASSET
Website Navigation / Header	brainy-horizontal-lockup.svg
Website Footer	brainy-horizontal-lockup.svg or symbol-only
GitHub README Header	brainy-readme-header.png
GitHub Social Preview Card	brainy-repository-preview.png (1280x640)
GitHub Organization Avatar	brainy-github-avatar.png (500x500)
Website Favicon & Browser Tabs	favicon.ico / brainy-micro-mark.svg
Mobile Application Launcher	brainy-app-icon-1024.png / 512 / 192
Desktop Application Shortcut	brainy-app-icon-512.png
Application Dashboard	Horizontal lockup in navbar
Application Sidebar (Collapsed)	brainy-symbol.svg
Technical Documentation	Horizontal lockup in header, wordmark in footer
Executive Presentation Deck	Horizontal lockup on title, symbol on footer
Dark Interface & Backgrounds	Corresponding white variant (*-white.svg)

5. Design Integrity & Strict Negative Rules

To maintain brand prestige, professional credibility, and visual consistency, all developers, designers, and contributors must adhere to these mandatory restrictions:

? DO NOT stretch, skew, rotate, or alter the optical aspect ratio of the symbol or wordmark.
? DO NOT introduce gradients, neon glows, drop shadows, or 3D skeuomorphic treatments.
? DO NOT swap or re-arrange the symbol halves (Left is always AI Circuitry; Right is always Organic Brain).
? DO NOT crowd the logo with arbitrary text, slogans, or unsupported feature badges.
? DO NOT place the black logo on dark backgrounds or the white logo on light backgrounds.
? DO NOT compress the full horizontal wordmark into tiny app icon or favicon spaces.
? DO NOT substitute unofficial fonts or alter the lowercase styling of 'brainy'.
? ALWAYS respect the minimum clear space rule (equal to the height of the lowercase 'b').
? ALWAYS export in native vector SVG for scalable web and software applications.
